

The Board of Medcan Australia is pleased to announce it has secured its Medical Cannabis Manufacture Licence under the ODC (Office of Drug Control). This licence will allow Medcan, subject to individual permit issue, the ability to manufacture its range of products, including but not limited to:

- Dried flower finished products
- Full extract oils
- Tinctures
- Capsules
- Medicinal cannabis products manufactured in Australia under a GMP Licence
- Medicinal cannabis products listed as export-only or registered in the ARTG
- Extracts of cannabis (or cannabis resin) manufactured under a Narcotic Drugs Act 1967 Licence that are not in the final dosage form
- The Contract manufacture of other licenced producers' products

Medcan Australia's CEO, Craig Cochran commented, "We are extremely happy to secure our Manufacture Licence. This is the last ODC (Office of Drug Control) licence required for us to complete our vertically integrated business model".

Medcan has also secured a QLD Health Licence allowing for the storage of Schedule 9 substances, including Cannabis Seeds; and a DAWR Permit (Department of Agriculture and Water Resources Permit) allowing for the importation of plant materials, specifically cannabis seeds.

Medcan currently holds the following valuable ODC, Federal & State licenses:

- o ODC Medical Cannabis Cultivation and Production Licence
- o ODC Import Licence
- o ODC Medical Cannabis Manufacture Licence
- o ODC Export Licence
- o DAWR (Department of Agriculture and Water Resources) Permit
- o QLD Health Licence – Schedule 9 Substances
